

FIELD AGRONOMIST INTERNSHIP GERHAUS -AUSTRIA M/W

COMPANY PRESENTATION

Present in Europe, North Africa, South America, STAPHYT brings together more than 600 employees, of different nationalities and cultures.

Rich in multiple profiles, a wide range of expertise is expressed in the Group, through our areas of activity which are agronomic experimentation, regulatory advice and coordination of registration files.

JOB DESCRIPTION

Are you passionate about the agricultural world ? Would you like to discover experimentation ? Are you interested in joining a team where progress and fun are essential ? Then do not wait any longer and join us in the STAPHYT adventure !

For the 2023 season, we are looking for motivated and involted students to join our teams, in France and abroad.

And why not, after your internship, continue your journey together !

Your main mission :

Your role will be to assist the field agronomist in setting up and monitoring tests according to the principles of Good Experimentation Practices (GEP), Good Laboratory Practices (GLP) and in compliance with the protocols and Standard Operating Procedures.

Your technical missions :

- Assist in the set up of the test site with appropriate equipment
- Participate in the treatments by respecting the schedule and method of application, conditions and precautions of use
- Take samples according to the instructions (deadlines, intervals, stage of the crop, quantities, etc.)
- Carry out notations and observations on the trials
- Participate in the harvesting of trials and the management of harvested products
